

Build for the Agentic Enterprise. Sign up for your Developer Edition.

The entire Salesforce platform - exposed as APIs, MCP tools, and CLI commands. Build apps, ship agents, and let coding agents do the heavy lifting with Salesforce Headless 360.

- ✓ Build AI agents with Agentforce, grounded in your data with Data 360
- ✓ Connect Claude Code, Cursor, or Codex to your org with hosted MCP
- ✓ Build in the browser with the Agentforce Vibes IDE - no setup required
- ✓ Drag-and-drop when you want it, Apex when you need it
- ✓ 60+ MCP tools and 30+ coding skills, ready out of the box

Almost there, Yerra!
Check your email.

You'll receive a confirmation email soon. If you don't see the email, check your spam folder.

If we're getting a lot of signups at once, it can take a while for us to set up your Developer Edition. We'll send another email when it's ready.

Follow guided steps to finish setting it up, and use in-app guidance to learn Agentforce.

Queues

Queues

Queues allow groups of users to manage a shared workload more effectively. A queue is a location where records can be routed to await processing by a group of users. Records are routed to a queue when they are created or updated. You can specify the set of objects that are supported by each queue, as well as the set of users that can process records in the queue.

1 Prompt

+ Insert Resource

You are an AI customer support assistant.

Generate a professional summary for the following customer support case.

Use the available information:

- User Case Name: Input:User_Case__c.Name

- Issue Category: Input:User_Case__c.Issue_Category__c

- Priority: Input:User_Case__c.Priority__c

- Created Date: Input:User_Case__c.CreatedDate

Provide:

1. A brief summary of the customer's issue.

2. The urgency based on the priority.

3. A recommended next action for the support team.

Keep the response professional, concise, and easy to understand.
